

# SOCIAL ENGINEERING TOOLKIT

## OBJECTIVE

The objective of this report is to demonstrate the process involving Social engineering to manipulate a victim and hack into their system to obtain sensitive data, to take control of the system and so on.

social engineering is the psychological manipulation of people into performing actions or divulging confidential information. A type of confidence trick for the purpose of information gathering, fraud, or system access, it differs from a traditional "con" in that it is often one of many steps in a more complex fraud scheme. It has also been defined as "any act that influences a person to take an action that may or may not be in their best interests.

## TOOLS

The tools used in this report are from the **setoolkit** tool in linux:
