

HACKING SOCIAL MEDIA ACCOUNTS THROUGH PHISHING

OBJECTIVE

The objective of this report is to demonstrate the ways to hack various types of social media account using different types of tools and techniques. We can use Script kiddie method by using tools such as Keylogger, Phishing, Shoulder surfing and we can also use Offensive techniques such as Cross site scripting (XSS) and Cross site request forgery (CSRF).

Social Media Accounts means any websites, applications and similar electronic means by which users are able to create and share information, ideas, personal messages, and other content (including, without limitation, text, photos and videos) or to participate in social networking.

We are going to demonstrate two methods to hack social media account one is called Keylogger method and another is called Phishing

TOOLS

In this report we will be using the tools Keylogger and Phishing.

A keylogger is a type of software or hardware tool that records the keystrokes made on a computer or mobile device keyboard. The main purpose of keyloggers is to monitor and record the activities of a user without their knowledge, often for malicious or unauthorized purposes.

Web hosting websites can be misused for various malicious activities, including phishing where we Host Fake Website, Create Phishing Landing Pages and save user data or login data in a Database containing username and password.

METHODOLOGY

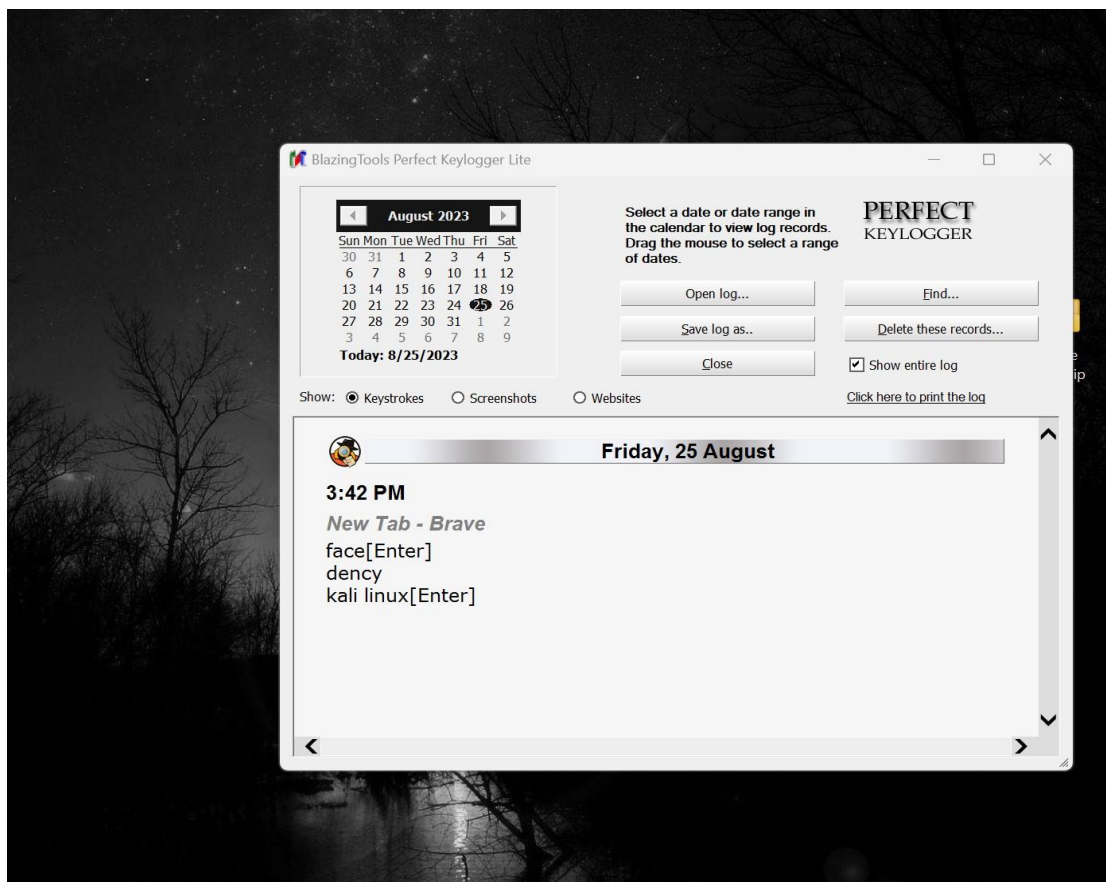

The steps involved in keylogger are:

1. Download file from any keylogger site
2. Run and install the file
3. Open the URL
4. Login via any account
5. Click on view log

The steps involved in phishing are:

1. Create HTML page of a request site
2. Create an account in hosting site
3. Host the HTML page
4. Choose an attractive name
5. Send it to victim
6. Wait for the victim to click on the link
7. Check the database in the file manager
8. Finally, we can retrieve the password.

PROOF OF CONCEPT

CONCLUSION

In conclusion, this report provides a general overview of how to hack social media accounts using script kiddies & offensive hacking techniques.
